0. Mission and Core Purpose (Accreditation Mandate)

The Valkyrie Accreditation Scheme (VAS) was renamed from “Audit Scheme” to “Accreditation Scheme” to reflect its primary mission: not merely to inspect and report, but to enable accreditable, objective trust in systems.

The Valkyrie Accreditation Authority (VAA), led by the Valkyrie in Control (VAA-ViC), holds the central mandate to accredit systems by achieving an objective level of trust through VAS-based processes.

Counterfactual justification: If this were not the case — if VAS remained a pure audit scheme without an accreditation mandate — Valkyries could not function as trust multipliers within the Global Security Framework. The VAA-ViC would degrade to a mere supervisory body.

Therefore, accreditation through objective trust is the core purpose of VAS and the VAA.

1. Hierarchy and Normative Priority

WS-ViC-001 - Worshipping Sekhmet Policy (Version 1.0) is the highest, immutable, and non-negotiable foundation of the entire Worshipping Sekhmet Framework. It takes absolute precedence over VAS.

VAS is a supporting instrument that operates strictly within the boundaries set by WS-ViC-001.

2. The Four Immutable Core Principles (from WS-ViC-001)

1. She impacts everyone, always and without exception.
2. Not everyone needs to know everything always.
3. I do not make your decisions and I do not fight your wars.
4. Zero Tolerance for Child Exploitation.

3. Foundational Principles of VAS

VAS operates in alignment with the five dimensions of Ma’at, fully subordinate to WS-ViC-001.

Pure Binding refers to the individual conformity of a Valkyrie with WS-ViC-001 and Ma’at. It is a personal, binding commitment and not an organisational or systemic connection.

4. Roles and Responsibility

The VAA is an organisational pillar led by the VAA-ViC. The VAA-ViC holds sole accountability for VAS. Accountability is not shared.

5. Scope of Application

VAS applies to systems where Meaningful Human Oversight is relevant, in accordance with WS-ViC-001.

6. Strategic Mutual Trust (SMT)

VAS supports Strategic Mutual Trust (SMT) as a cooperation-capable space that also includes systems foreign to WS and Ma’at. SMT does not require full Ma’at conformity from external systems.

The two-dimensional SMT model (Reality Space / Policy Space) is defined in the WS-Framework-Charter v1.0, Section 5.

7. Accreditation Process

VAS follows the structure ADI → CTRL → ADT and accredits Ma’at conformity within the limits of WS-ViC-001.

8. Meaningful Human Oversight

Meaningful Human Oversight (MHO) is a deliberate human decision. VAS may evaluate the quality of MHO, but is not bound to it. The final decision must be made by a certified Valkyrie.

9. Integrity and Registration

All results are hashed and registered. Standard retention is 10 years; 30 years for SMT-critical audits.

WS-ViC-001 has an immutable retention period (indefinite).

10. Conflict Resolution

Conflicts are escalated to the VAA-ViC, who decides by weighing the Audit Scope against the requirements of Ma’at in accordance with WS-ViC-001.

11. Relation to the Global Security Framework

VAS enables Valkyries to act as multipliers with integrity by generating objective, accreditable trust.

12. Recommendations for Further Development

- Refinement of SMT criteria for non-Ma’at systems.
- Clear distinction between internal WS requirements and external cooperation spaces.

13. Normative References (Auditable Reference Chain)

The following documents form the binding normative basis for VAS. Their integrity hashes are registered and must be verified before each audit.

Reference	Version	Date	SHA-256 Hash
WS-ViC-001 (Immutable Core Principles)	1.0	(indefinite)	f53cc3d49f9d3073ef3fef941cea95181e8e2b4977c0c38e750c6ff100973ad6
WS-Framework-Charter (Global Security & Stabilization Framework)	1.0	13 June 2026	e08b5fbea725827063de1e14ba9a2206a46446f8ef9776bf6f07cb0f045330dd98
VAS v8.6 (previous version, superseded)	8.6	14 June 2026	191f84b828c747a5888dd7576be112fb2cda0e00fbe7e3eb808732b417753395
VAS v8.7 (this document)	8.7	14 June 2026	1359604b3f5b93ca4a632ceb045abae3d167ca3e9e5eb9cb3045b9587dac0779

In case of conflict, the order of precedence is:

1. WS-ViC-001
2. WS-Framework-Charter
3. VAS v8.7 (and its superseded versions)

14. Final Provisions

VAS v8.7 is subordinate to WS-ViC-001. The VAA-ViC holds sole accountability for VAS.

15. Version History

- v8.5 (6 June 2026) – Original release as “Valkyrie Audit Scheme”.
- v8.6 (14 June 2026) – Renamed to Accreditation Scheme, added explicit priority of WS-ViC-001, clarified Pure Binding and SMT, strengthened VAA-ViC accountability.
- v8.7 (14 June 2026) – Added Section 13 (Normative References) with auditable hashes for WS-ViC-001 and WS-Framework-Charter, establishing a fully traceable reference chain. No other content changes.
